

CruzBuy Punch-out Access Issue

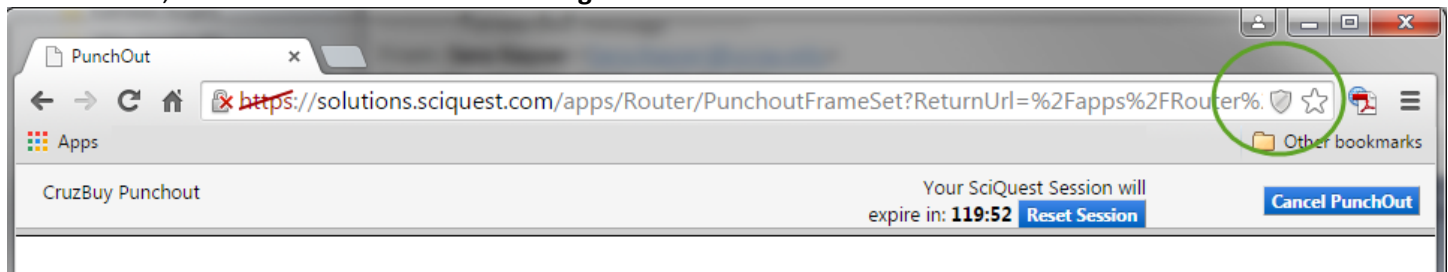

Some CruzBuy punch-out sites contain a combination of secure and non-secure content (i.e., Mix Content Blocker) that Firefox and Chrome browsers may block, preventing the punchout from displaying or working correctly. Users will need to disable the Mix Content Blocker in order to shop with these punchout suppliers.

To disable Mix Content Blocker, locate the shield icon on the address bar. The shield icon may not appear immediately for some punchout suppliers.

On **Firefox's**, the shield icon is located on the **left**-hand side of the address bar

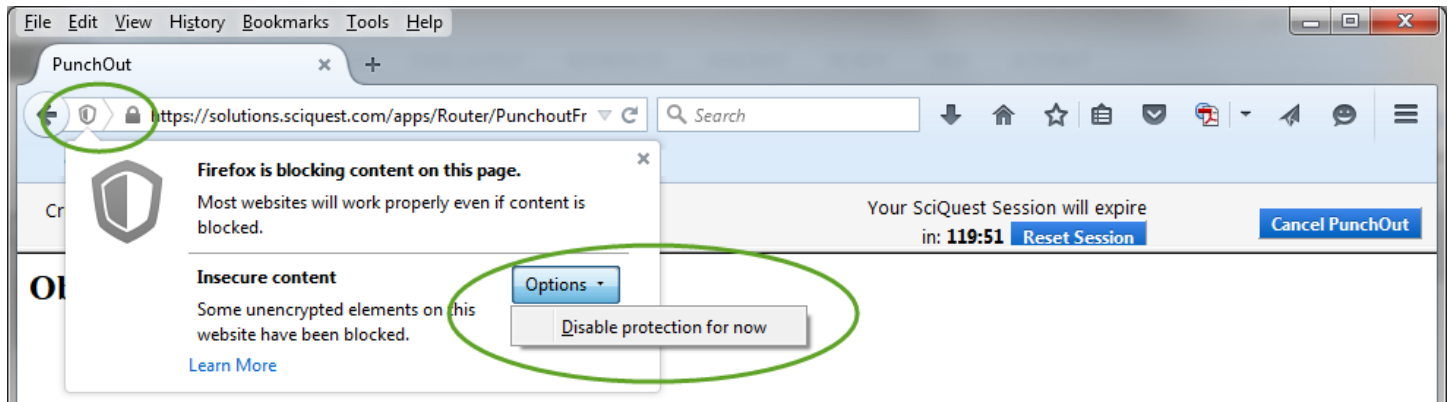

On **Chrome's**, the shield icon is located on the **right**-hand side of the address bar

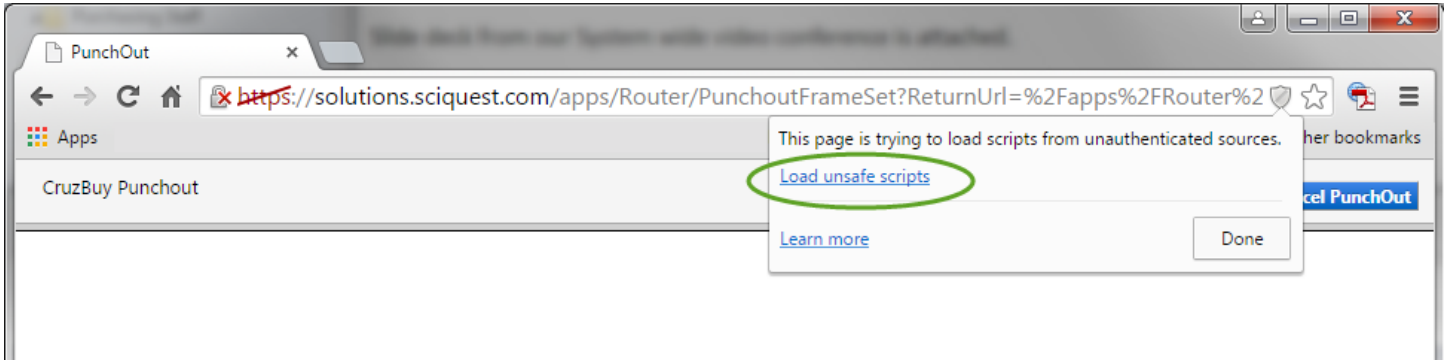

Click on the shield icon and select "Disable production for now" (**Firefox**) or "Load unsafe scripts" (**Chrome**).

Firefox

Chrome
