4.6 INTERLOCATION TRANSFERS

Employees who are coming from or going to another campus in the UC system, without a break in service, are considered Interlocation Transfers.

A permanent interlocation transfer occurs when an employee terminates employment with one campus, accepts employment at another campus, and does not intend to return to work for the original campus.

A temporary interlocation transfer occurs when an employee at one campus (home campus) accepts a position at another campus (host campus) for a period of one year or less, with the intent to return to work for the home campus at the end of this period.

Multilocation appointments occur when an employee is employed by two or more campuses simultaneously. The campuses at which the employee are employed are designated home and host campuses.

A one-time payment is required when an employee at one campus (home) is eligible to receive a payment originating from another campus (host).

Multilocation appointments and one-time payments will not be covered here, as they do not apply to the Payroll/Personnel System, with respect to on-line entry update (OEU).

For both the Permanent and Temporary Interlocation Transfer, the data bases of both the home and host campus must be updated to reflect the transfer.

The Academic Divisions and Staff Employment responsibility for interlocation transfers are to determine that an interlocation transfer situation exists.

Since July, 2005 Academic Divisions and Staff Employment Office are updating their own permanent interlocation transfers. Payroll’s role is auditing the transactions post online entry update (OEU). This gives the Academic Divisions and SHR Teams more control over timing and management of their affected employees.

The following outline both outgoing and incoming transfer procedures for both permanent and temporary in nature:
